Subject: Microsoft Settlement

I am writing to protest the proposed settlement in the government's case against Microsoft. Allowing the guilty party to design its own punishment -- and in particular, one which will *increase* its monopoly over its competitors (providing the educational system with MS software -- when the schools are currently using Apple technology) -- is corrupt, weak-willed, and Just Plain Wrong.

I hope the court is *far* more punitive with Microsoft and takes charge of this case. As of now, it appears that political concerns are driving a legal decision and that is a disgrace.
